OLYMP

Autumn/Winter 2026

True luxury is revealed in the understated - in lasting quality and the calmness it exudes. In the Autumn/Winter 2026 season, material, form and atmosphere merge to create an expression of style and consistency.

OLYMP SIGNATURE interprets comfort as an expression of modern elegance - minimalist, precise, timeless. The finest cotton, exquisite cashmere and subtle contrasts in colour and texture create pieces that effortlessly integrate into everyday life.

Pure, high-quality virgin wool – soft to the touch, distinct in form and made for everyday wear.

Virgin wool regulates temperature, retains its shape and looks neat and fresh even after washing. A smart classic that redefines comfort.

The finest cotton meets exquisite cashmere – soft to the touch, precise in cut. The material combines warmth and lightness, strength and softness. The palette of steel blue, slate, off-white, espresso and dark brown translates autumn into tones of substance and style. Made for moments between business and leisure.

## OLYMP SIGNATURE

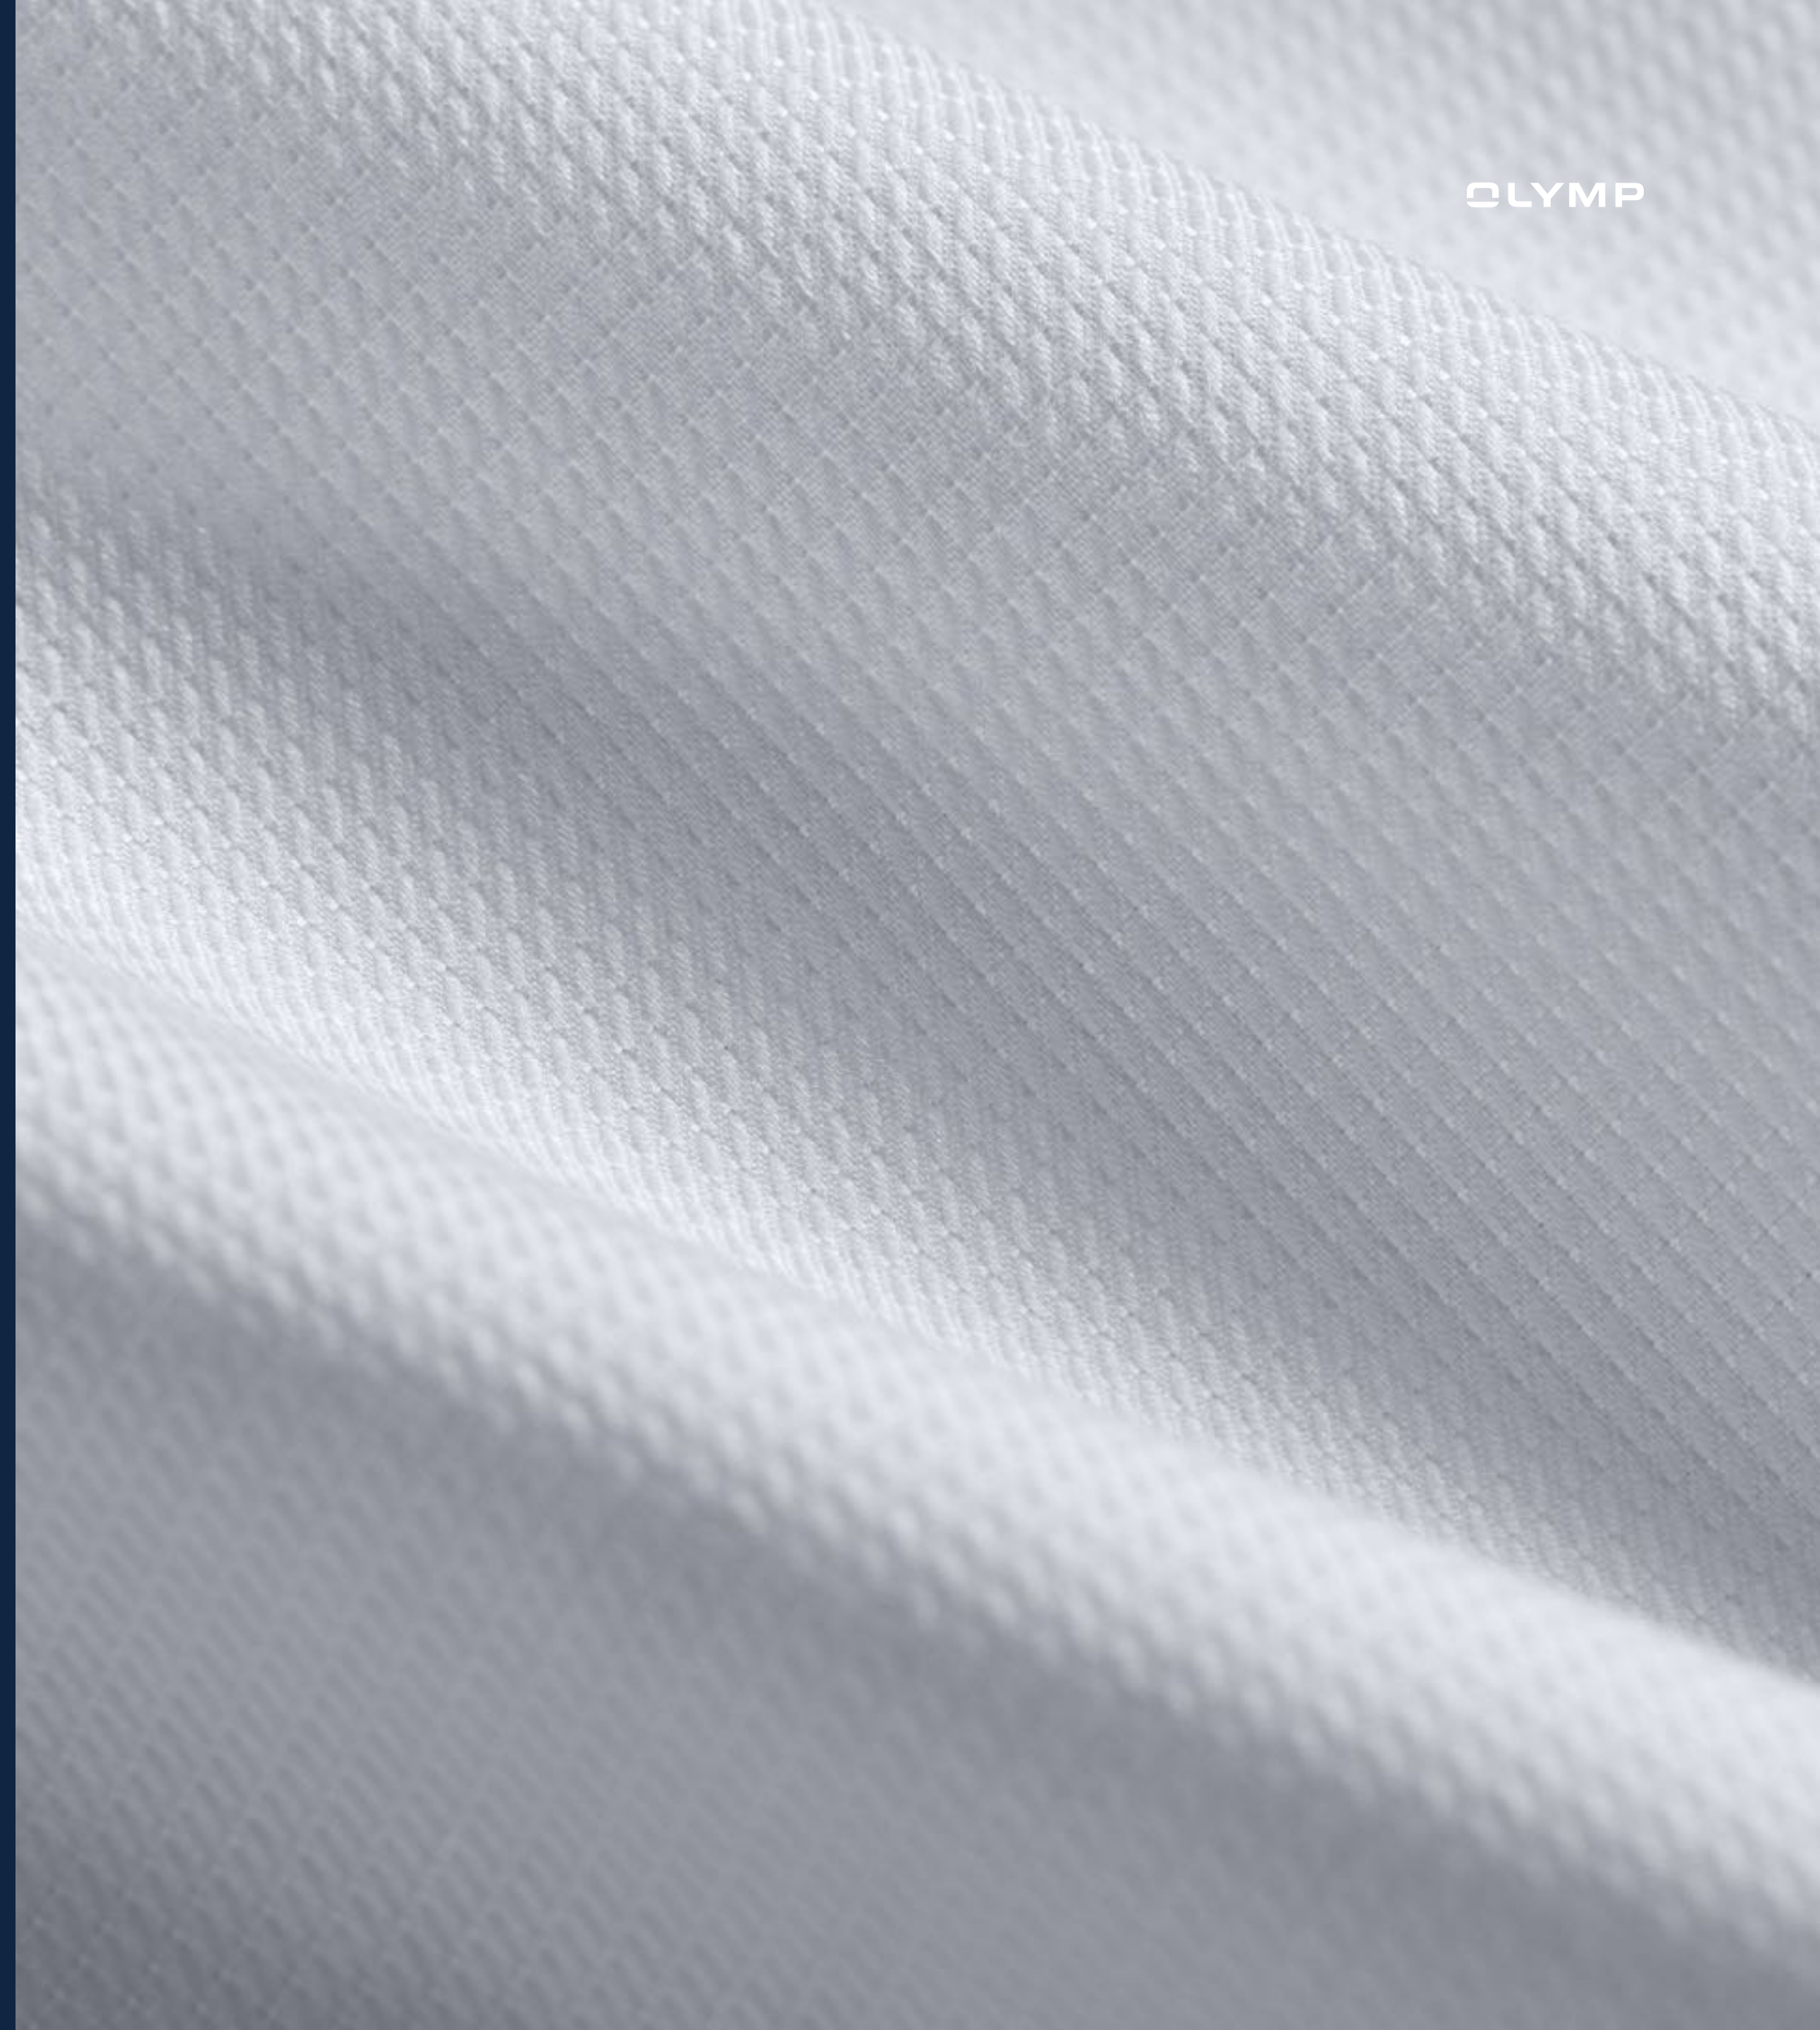

OLYMP SIGNATURE is based on a clear principle: Passion in every detail. The ultimate feeling. Committed to excellence. Tailored to fit. Product, people and planet in mind. You will feel it when you wear OLYMP SIGNATURE.

USP SHIRT

## **Premium Cotton. A Unique Feeling.**

Fine premium cotton fabrics, primarily in full-twist quality (two-ply), made from particularly fine yarns, testify to exclusivity. The material's exceptional quality is combined with excellent ironing and care properties. And we're convinced: the unique wearing sensation is just as noticeable on you as it is on the shirt.

OLYMP

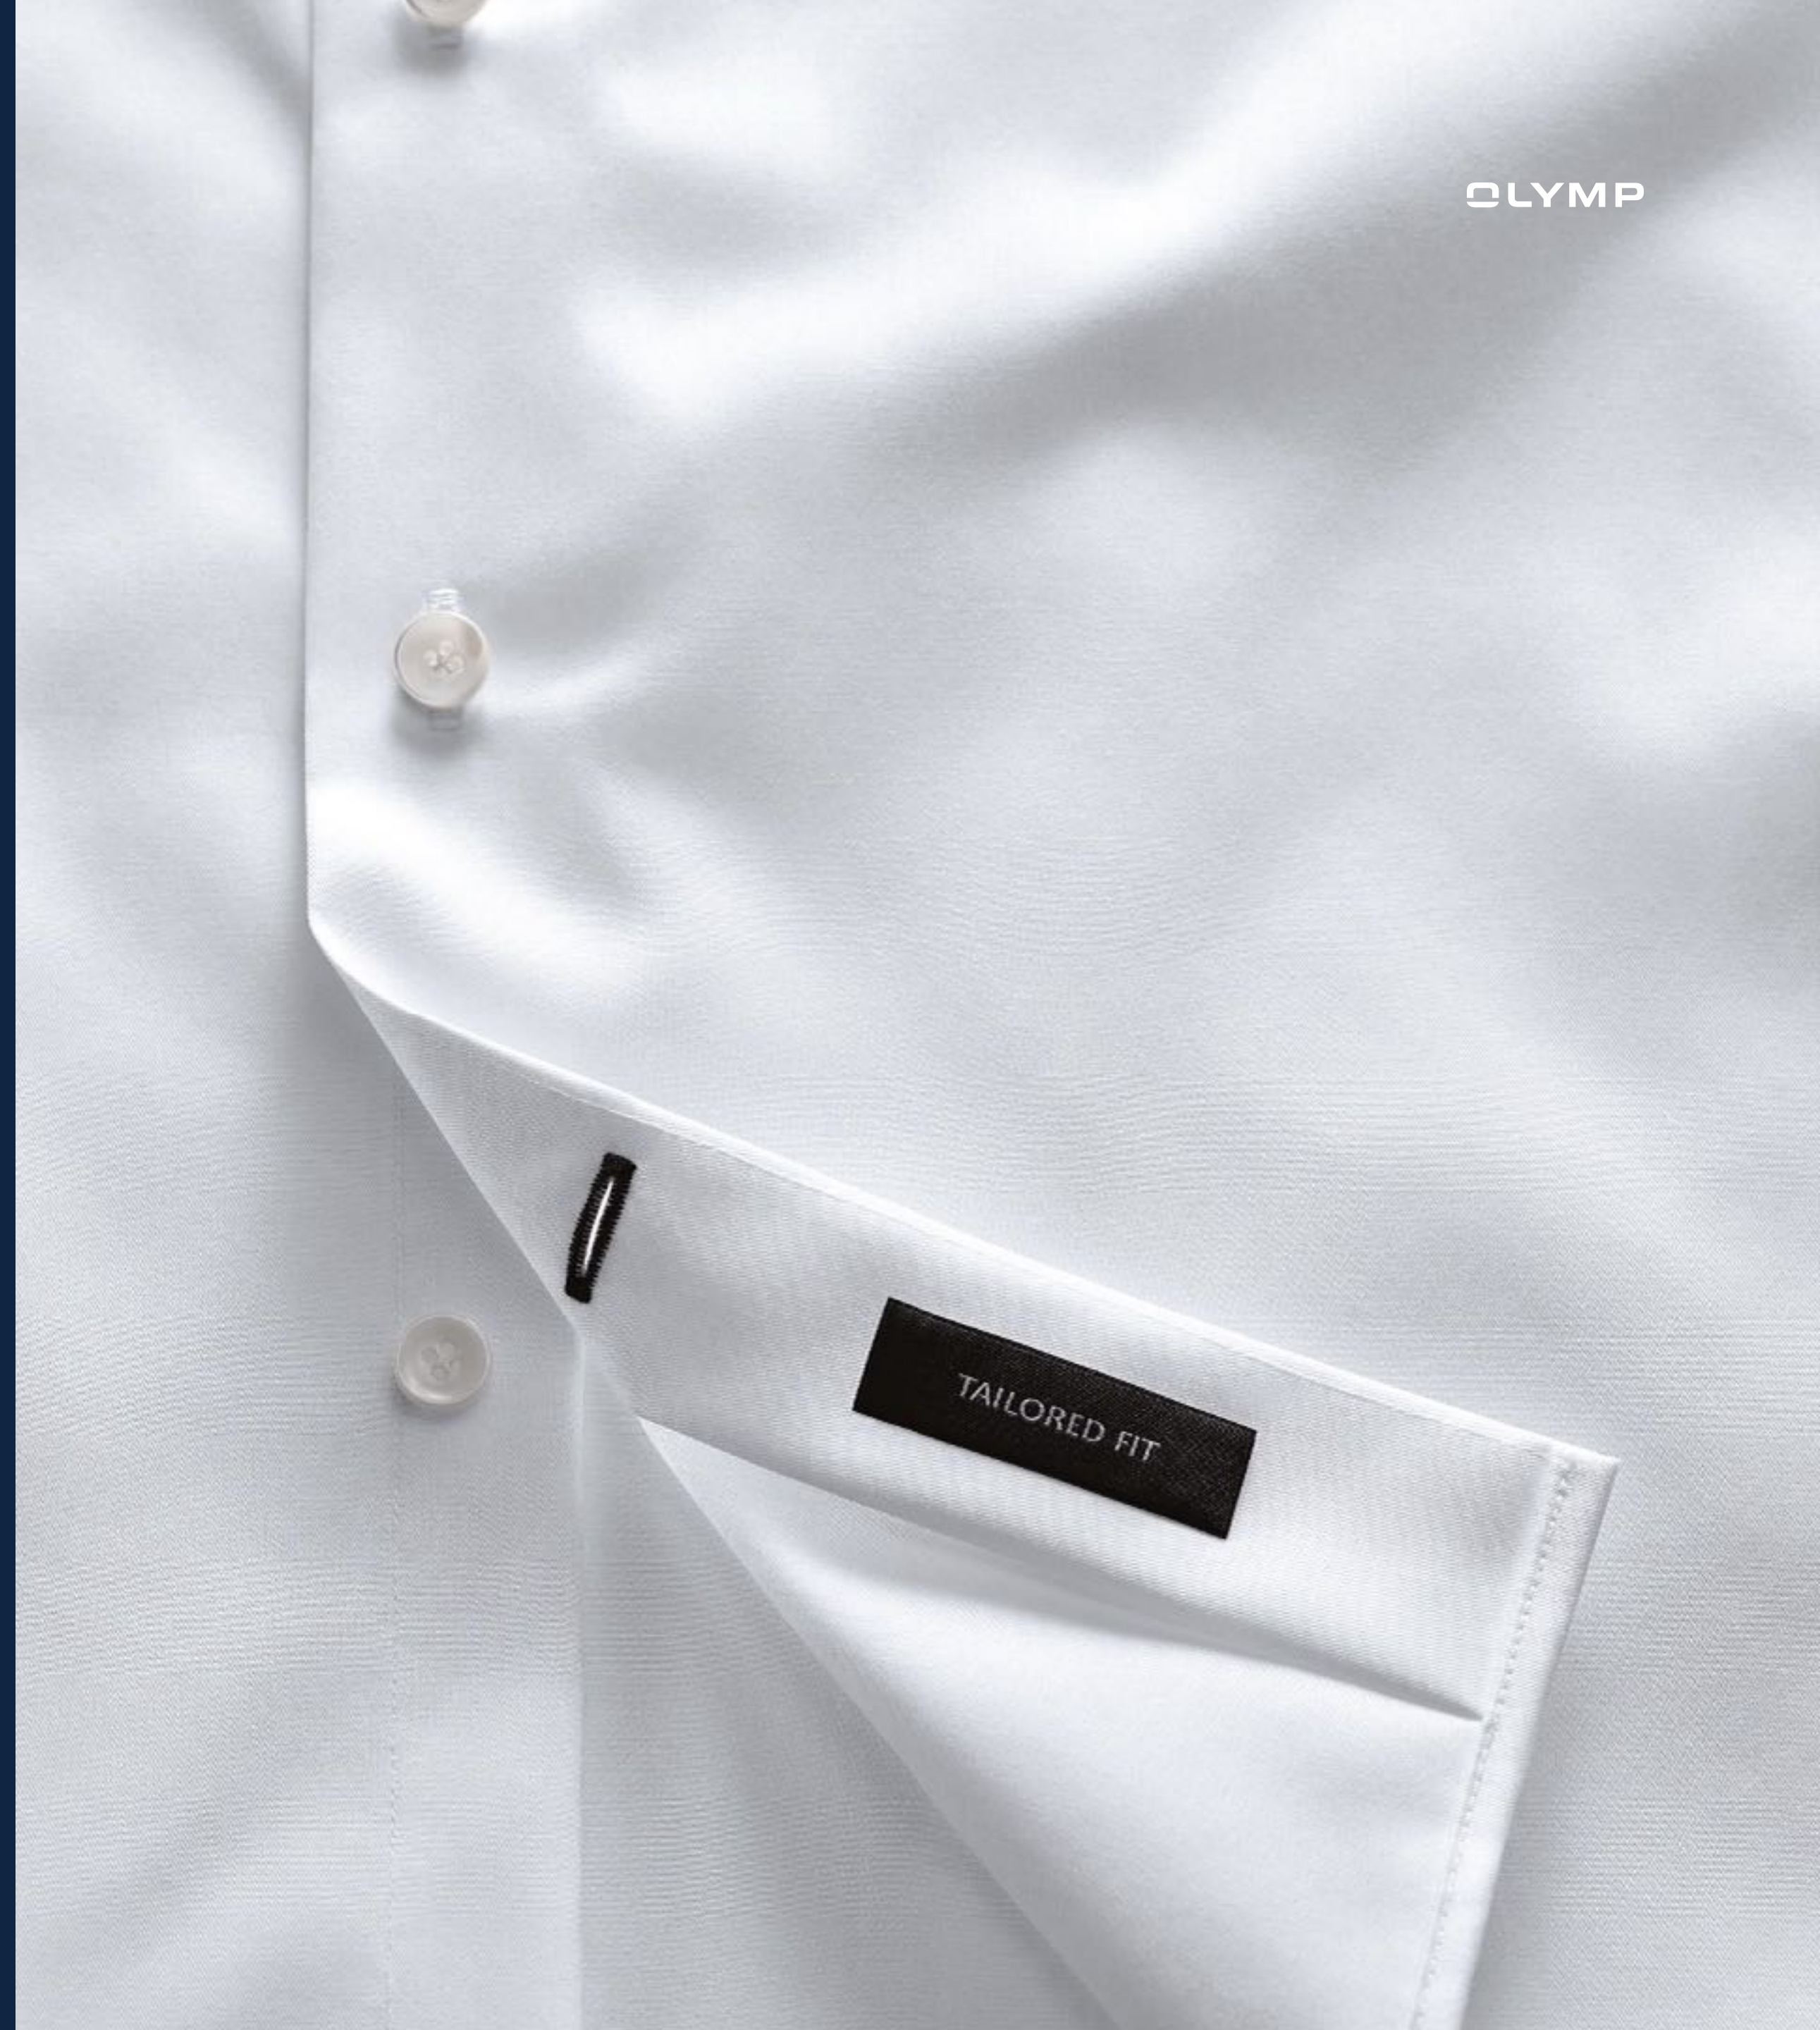

USP SHIRT

## Tailored Fit. As if Tailored-Made.

Whereas standard shirts are usually based on double sizes, i.e, the shirt body remains exactly identical over two neck sizes, with OLYMP SIGNATURE each individual size is cut according to individual measurements. Due to this finer gradation, the shirt adapts perfectly to the particular body shape. It wears as if tailor-made.

OLYMP

USP SHIRT

OLYMP

## **First-Class Workmanship. Right Down to the Very Last Detail.**

OLYMP SIGNATURE is tailored according to all the rules of craftsmanship. That's how we create the hand-sewn flat felled seams and buttonholes finished with an especially fine pearl stitch. The buttons, made of real mother-of-pearl or tagua nut, are polished and have lightly rounded backs to ensure smooth fastening. Using houndstooth stitch, we sew them on with a shank with the thread wrapped around it in an additional process - according to good Neapolitan tradition. The spare button is only for psychological security.

## **A Comfortable Collar. Pleasantly Soft yet Sturdy.**

The collar is the face of the shirt. For OLYMP SIGNATURE, we make it with the necessary sturdiness for a correct fit, but with a soft, generously proportioned interlining. The neckline, which sits a little lower than usual in the vicinity of the top buttons due to the special workmanship, offers noticeably increased comfort. Whether with the collar buttoned up or open. Removable collar stays, another quality feature, protect the collar tips during washing.

**Split Back Yoke.  
More Elastic, More Comfortable ... More Distinctive.**

The back yoke of an OLYMP SIGNATURE shirt is also entirely tailored to achieve maximum comfort. We divide it in the middle and join the halves with a separate seam where stripes and checks mirror each other. In addition to this visual feature, the split makes the shoulder area more snug and elastic - and offers more comfort when moving. Another advantage: The material allowance folded in to both sides along the dividing seam forms a third layer of fabric and makes it impossible for the label to show through, even on white shirts.

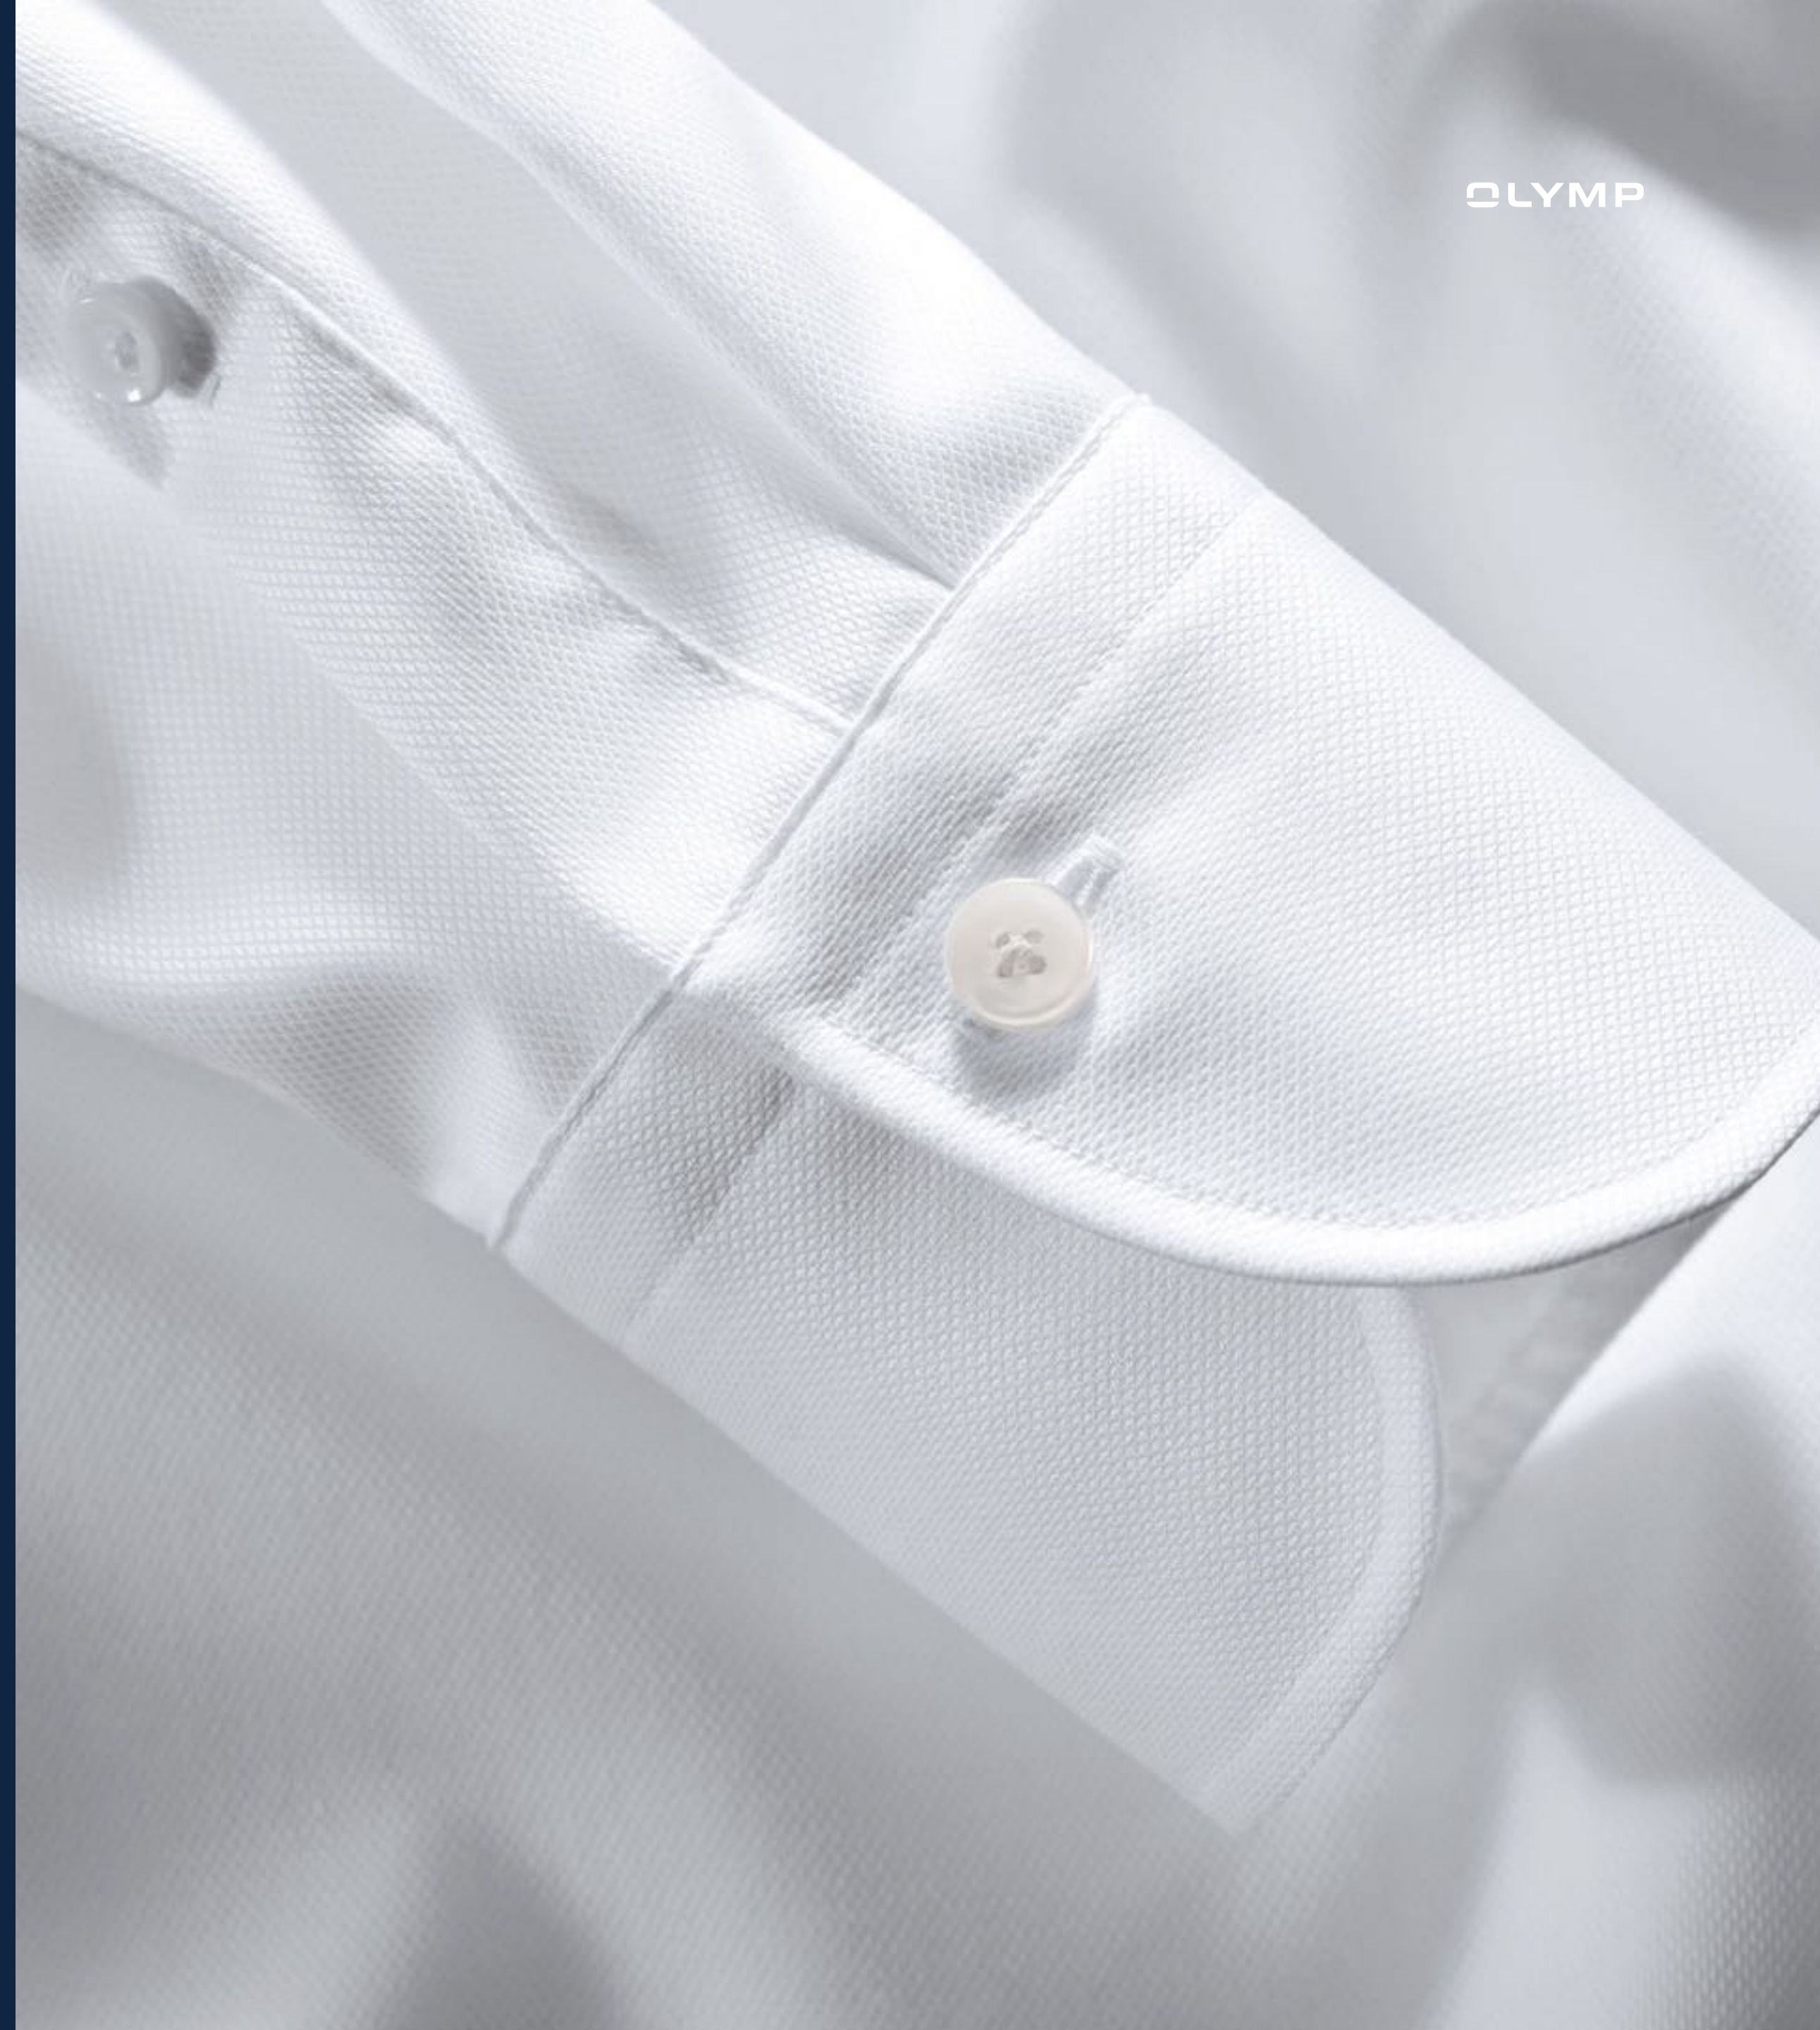

USP SHIRT

## **Flexible Cuffs. Adapt Themselves.**

Every OLYMP SIGNATURE cuff has a generously rounded edge. We consciously position the button closer to the sleeve, allowing the cuff to flexibly adjust in width when the arm is moved. And slides over your watch, for instance, without you feeling a thing or having to help it along. There is no need for a second button to adjust the width, which gives the cuff a uniquely elegant look.

USP SHIRT

OLYMP

## **The Hem Gusset. Fashionable and Effective.**

A shirt doesn't have an easy life. The front and back sections are subject to high levels of stress. In order to absorb these, an OLYMP SIGNATURE shirt has a small but elaborately crafted triangle inserted at the join, the so-called hem gusset. A feature which is not only practical, but also fashionable.

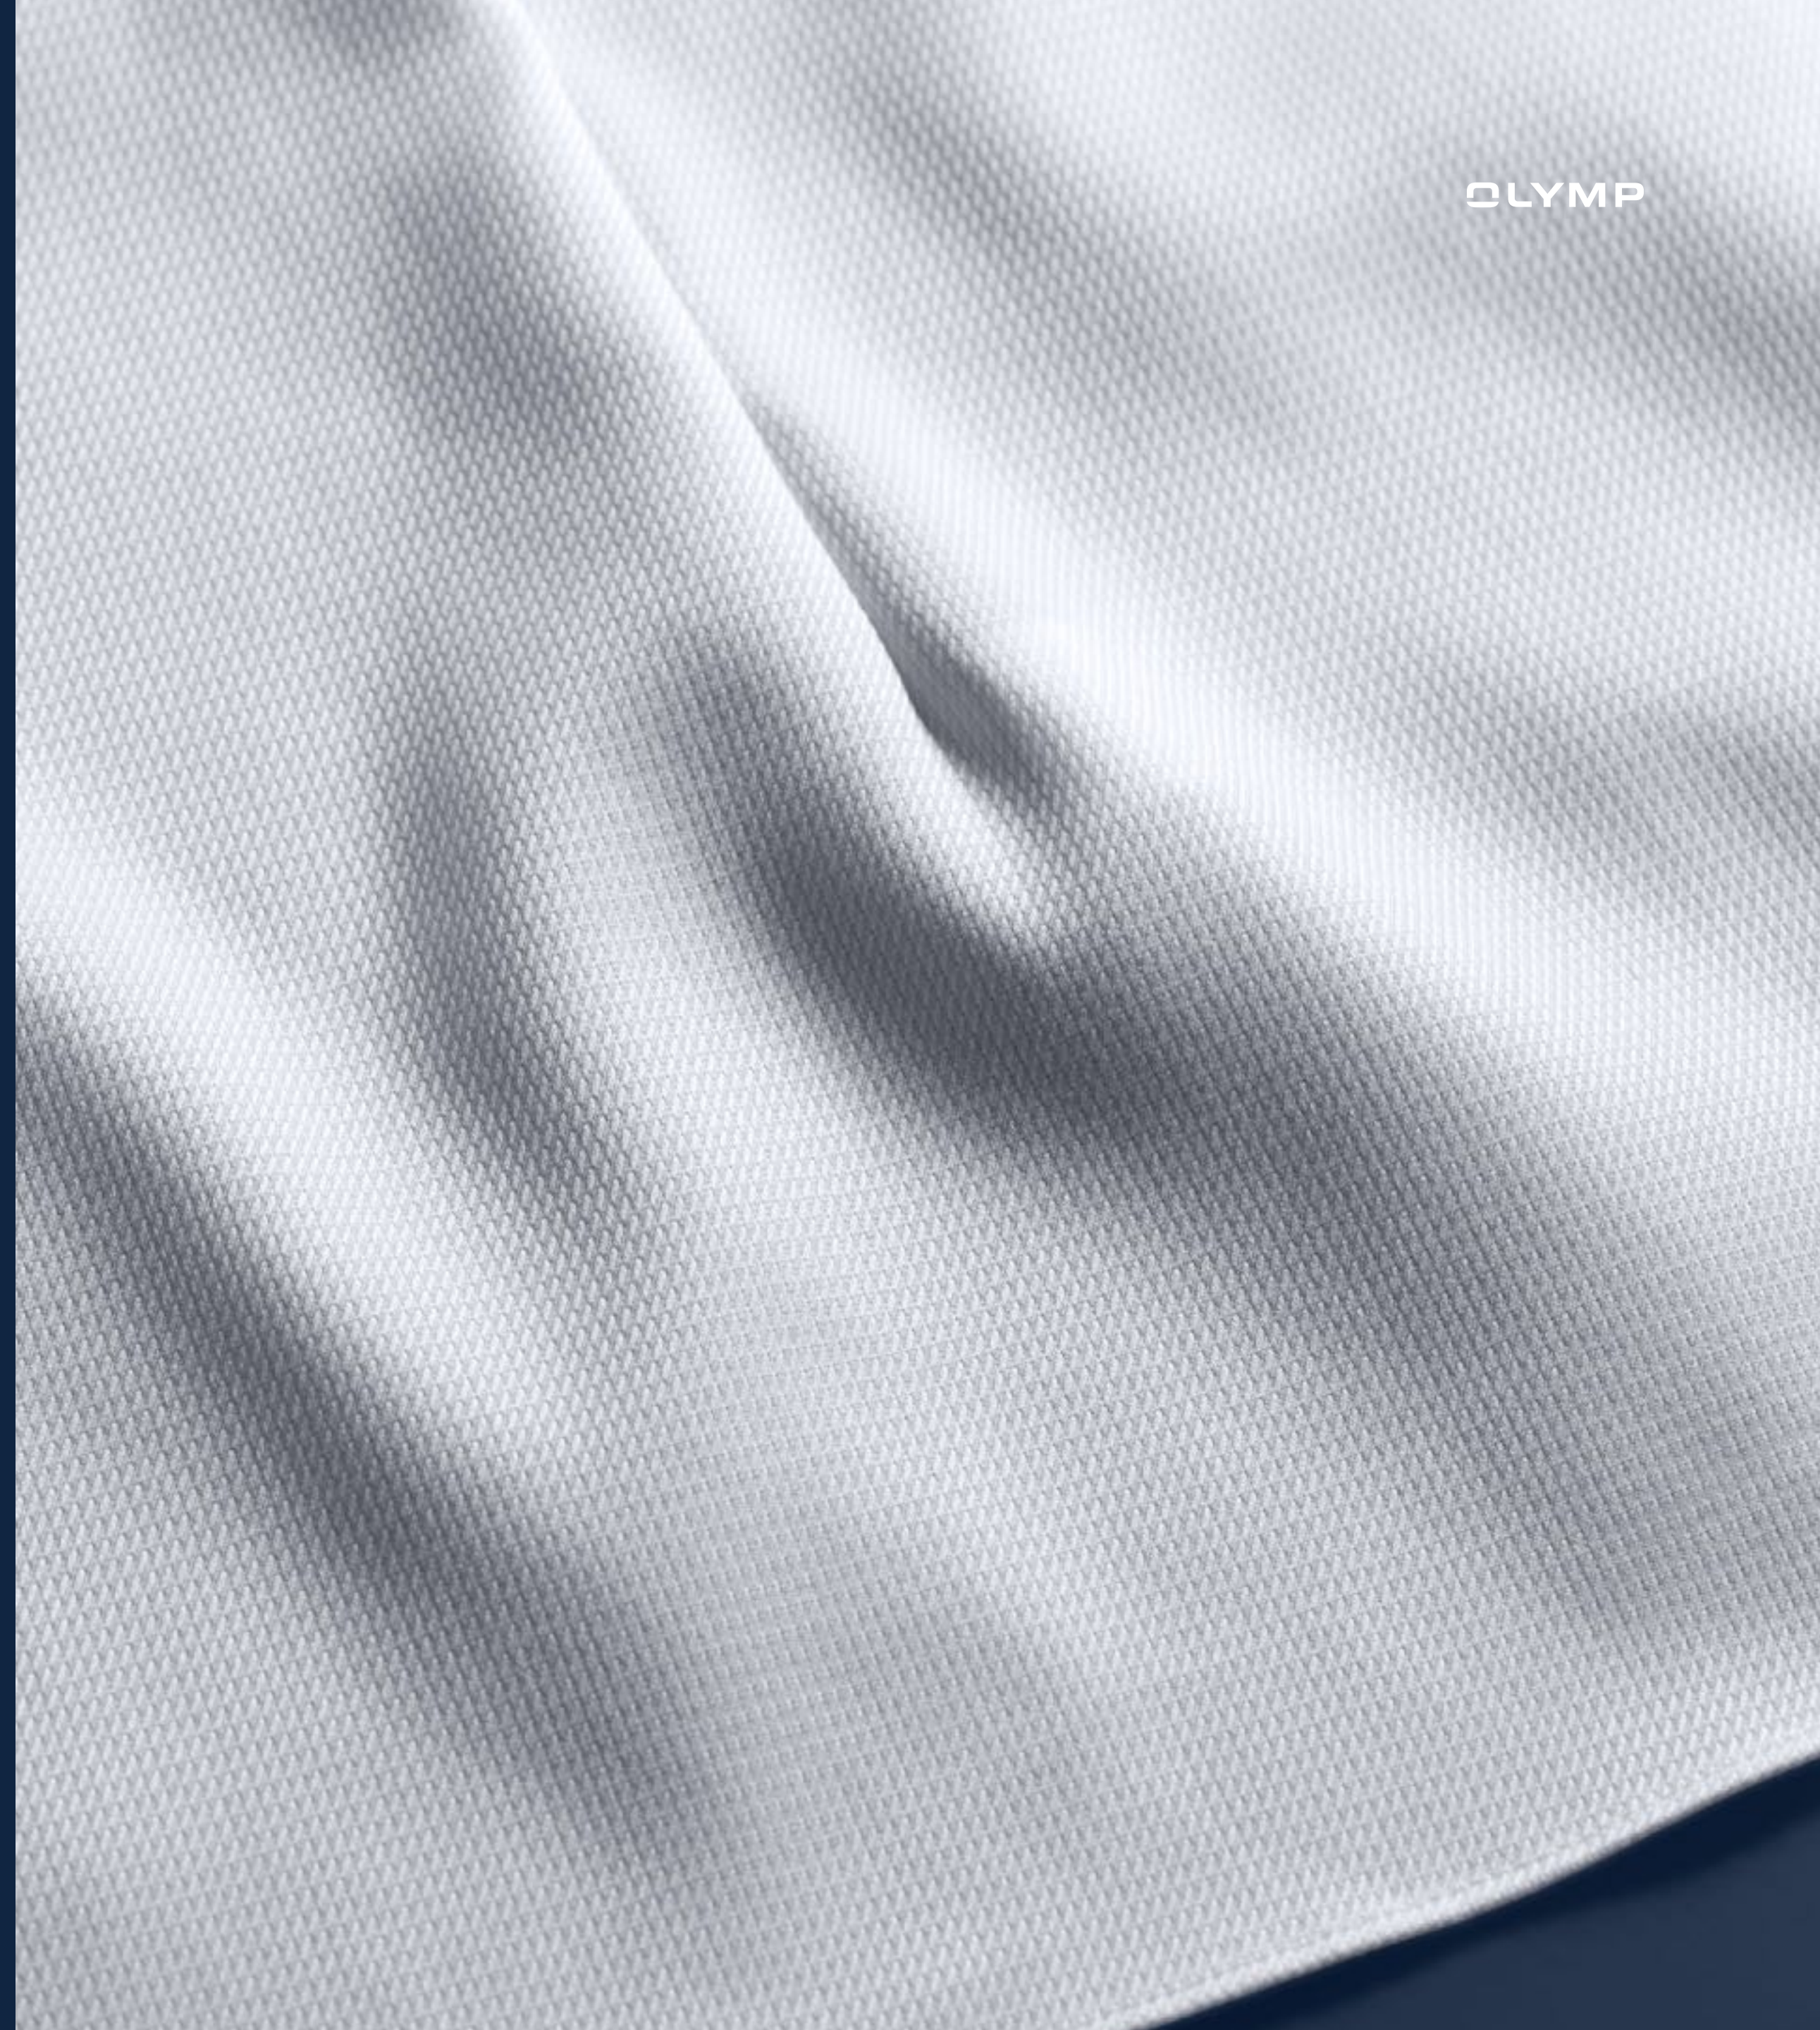

USP SHIRT

## **The Back Darts. Room for Growth.**

Every OLYMP SIGNATURE shirt has two darts in the back which have been closed using special stitches. These stitches can easily be opened if required. When they are closed, they accentuate the tailored figure. When open, they provide around four centimetres of additional width. This means that an OLYMP SIGNATURE shirt is able to grow with you, to a certain extent.
